Full-stack developer

- Design and developed the user interface of the e-commerce website. Implemented Angular, HTML, CSS, and TypeScript to create an interactive and responsive user interface and spring Boot for the backend.

PROJECTS

ANIME WORLD

- User Registration & Login System Anime World is a simple web-based authentication project that includes user registration, login, remember me, forgot password, and password visibility toggle features. It uses HTML, CSS (Bootstrap), and JavaScript, storing user data securely in the browser using localStorage and sessionStorage.
- Project Link: https://bespoke-figolla-8b7cab.netlify.app/

SHOPPING KART

- Developed a full-featured e-commerce shopping cart application with a responsive frontend using Angular and a secure backend using Java (Spring Boot).
- Implemented core functionalities including product listing, cart management, user authentication, and order processing.
- Integrated RESTful APIs for seamless communication between frontend and backend.
- Utilized Angular services and components to manage state and handle dynamic updates in the user interface.
- Designed and built backend services for product catalog, user management, and checkout process.
- Ensured input validation, error handling, and a clean, user-friendly UI for enhanced user experience

CRUD Operations Web App

- Developed a full-stack CRUD web application with Angular frontend and Java Spring Boot backend.
- Implemented Create, Read, Update, and Delete operations with real-time UI updates.
- Integrated RESTful APIs for smooth communication between frontend and backend services.
- Applied form validation and error handling for a seamless user experience.
- Structured code for maintainability using Angular components and Spring Boot controllers.
